-----

Renewable energy droughts, often also labeled "Dunkelflaute" events, are often framed as showstoppers of the energy transition. Here, we analyze drought events for solar photovoltaics, on-

Europe Adds 19 GW Wind in 2025, But Power Market, ETS Reforms Pose Risks Over the same period, Europe connected 2 GW of new offshore wind capacity to the grid, the lowest

European Solar Industry Responds to Market Changes: Focus on Hybrid PV and New Financing Models The European solar market continues to grow. According to SolarPower Europe's

Focus on solar, wind, batteries and heat pumps Under the scheme, France will provide support for investments expanding domestic manufacturing capacity for net-zero technologies listed

Trump argued that Europe's energy transition toward wind power is benefiting Chinese manufacturing rather than supporting domestic or allied industries. His remarks reflect broader concerns within the

European energy giant Vattenfall has started construction on a new hybrid renewable energy project in southwest Germany that combines wind and solar power at a single site. The

Wind and solar energy made up a record share of the European Union's (EU) electricity generation in the first half of 2024, overtaking fossil fuels

As of 2017, renewables represented 4.9% of gross inland energy consumption and 6.6% of gross electricity generation in Malta, some of the lowest shares in the

Conclusion Spain is no longer just a solar powerhouse -- it is becoming Europe's flagship hybrid market, where solar, wind, and storage converge into a single, flexible, high-value asset class.

Solar and wind outpaced demand growth in the first half of 2025, as renewables overtook coal's share in the
