What is the current Solar Panel Recycling Market size?

The Solar Panel Recycling Market is projected to register a CAGR of greater than 18% during the forecast period (2024-2029) [Read More](#)

The booming solar panel recycling market is poised for significant growth, reaching an estimated \$150 million by 2033. Learn about key drivers, market trends, leading companies, and the

Solar panel recycling is an evolving market that addresses the growing need for sustainable disposal solutions for Solar Photovoltaic (PV) panels. These panels, primarily composed of glass, pose a

The Solar Panel Recycling Market stood at \$0.47 billion in 2026 and is projected to grow to \$1.72 billion by 2035, at a CAGR of 15.43%.

Solar PV panel market projected to hit \$641.1 billion by 2030, at a CAGR of 11.9%. Growth of market is driven by gradual transition of energy industry from

Solar power is safe, efficient, non-polluting and reliable. Therefore, PV technology has a very exciting prospect as a way of fulfilling the world's future energy needs. During the past several

**Solar Panel Recycling Market Summary** The global solar panel recycling market size was estimated at USD 384.4 million in 2025 and is projected to reach USD

The Solar Panel Recycling Market worth USD 461.11 million in 2026 is growing at a CAGR of 9.28% to reach USD 718.7 million by 2031. Veolia

The year 2024 was a true landmark year for solar power. Global solar installations reached nearly 600 GW - an impressive 33% increase over the previous year - setting yet another record.

# Photovoltaic panel dismantling market prospects

PV modules are the central component of the solar industry. This analysis reviews market conditions that affect solar panel pricing and availability.

Reusing modules (potentially preceded by repairing) is conceivable, but practically and economically challenging. Recycling processes for thin-film and crystalline silicon PV panels have been developed.
